

Retail Chain Eliminates Stockouts While Reducing Inventory

Retail

\$1.2B Revenue

GoodStock Pro

Key Results

98.5% Service Level: Up from 91.2% baseline

18% Inventory Cost Reduction: Significant savings

\$85M Working Capital Freed: Cash released from inventory

The Challenge

This national retail chain was struggling with the classic retail inventory dilemma: maintaining high service levels while controlling carrying costs. With 200+ stores across 15 states, 25,000 SKUs, and complex seasonal demand patterns, they faced significant operational challenges.

The Solution

GoodStock Pro provided store-level optimization for 200+ locations, automated replenishment, advanced demand forecasting, and real-time analytics across all stores.

Client Testimonial

"GoodStock Pro solved our impossible dilemma. We achieved 98.5% service levels while reducing carrying costs by 18%. Our store managers finally have the tools they need to make data-driven inventory decisions."

— VP of Supply Chain Operations
